Subject: Workers shouldn't have to fight the EEOICPA for illnesses that was cause by these two sites

Portsmouth and Paducah scoring by the DOE. As you can see by the scoring both sites double the scoring for the superfund list. What this means we both our one of the worse sites in the world. Workers at these two sites should not have to fight for Illnesses. We have a wide spread of Plutonium and many other toxic chemicals that is causing death and illnesses. May 4, 1994
